In re Application of

Ishiwata, H. et al.

Serial No.: 09/988,322

Group Art Unit: 2828

Filed: November 19, 2001

Examiner: Vy, Hung

For: AUTO POWER CONTROL CIRCUIT FOR LASER DIODE

Honorable Assistant Commissioner of Patents Washington, D.C. 20231

AMENDMENT UNDER 37 C.F.R. §1.111

Sir:

In response to the Office Action dated August 28, 2002, please amend the aboveidentified application as follows:

IN THE CLAIMS:

FAX RECEIVED

NOV 2 9 2002

Please amend the claims as follows:

TECHNOLOGY CENTER 2800

X

1. (Amended) A power control circuit for a laser diode, comprising:

an amplifier circuit producing at an output terminal thereof an output voltage responsive to a voltage difference between a reference voltage and a feedback voltage that is indicative of an optical power generated by said laser diode in response to a driving current flowing therethrough; and

a driving circuit responding to said output voltage to control said driving current so as to make said voltage difference small,

said amplifier circuit driving said output terminal with a first time constant during a steady operation and with a second time constant that is smaller than said first time constant upon initiation and before said steady operation.
